

# **EXAMEN FINAL.**

**TECNOLOGIA**

- **RAMAS O BRANCHES:**

Hay una rama principal que es la MASTER, realmente las ramas secundarias nos permiten hacer cambios en un proyecto, sin necesidad de afectar al proyecto principal y esperando que se haga la unión si se ha aprobado el proyecto, al momento de volver a la rama principal, los cambios que se han hecho no aparecerán en la MASTER.

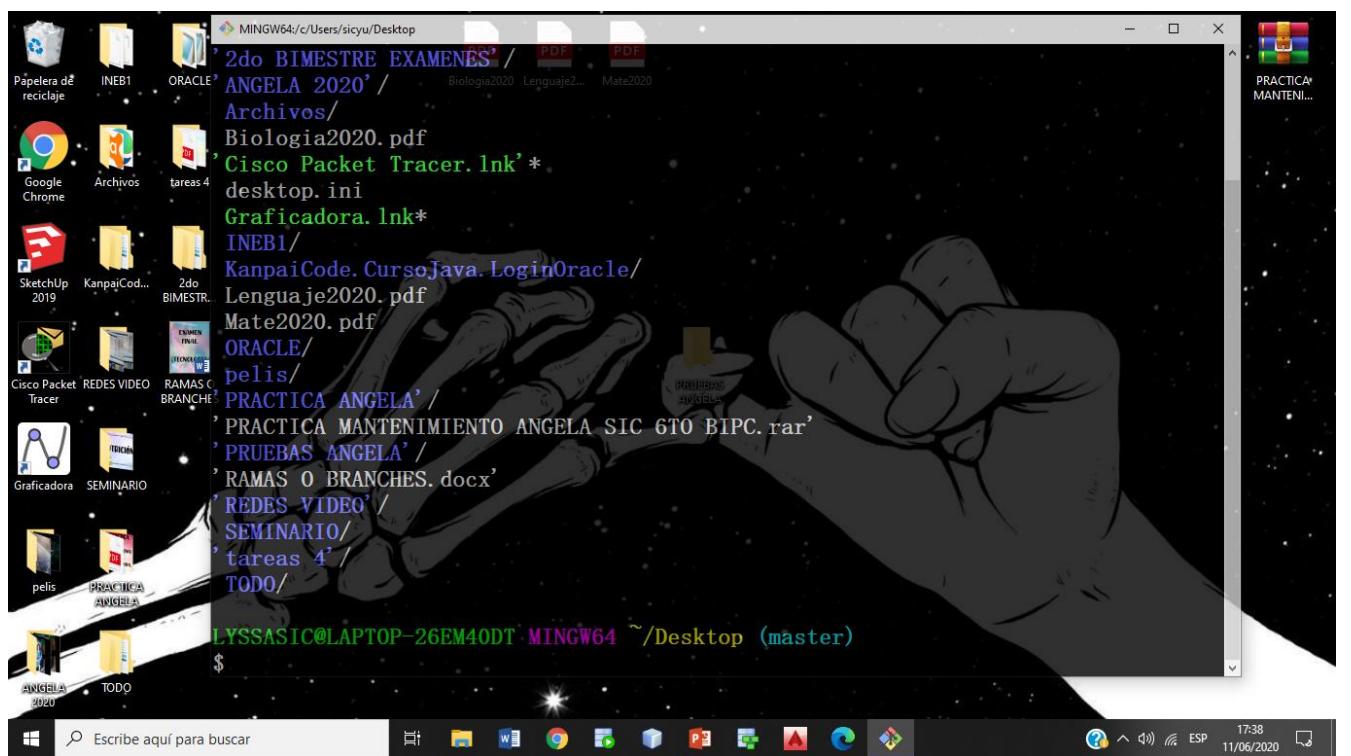

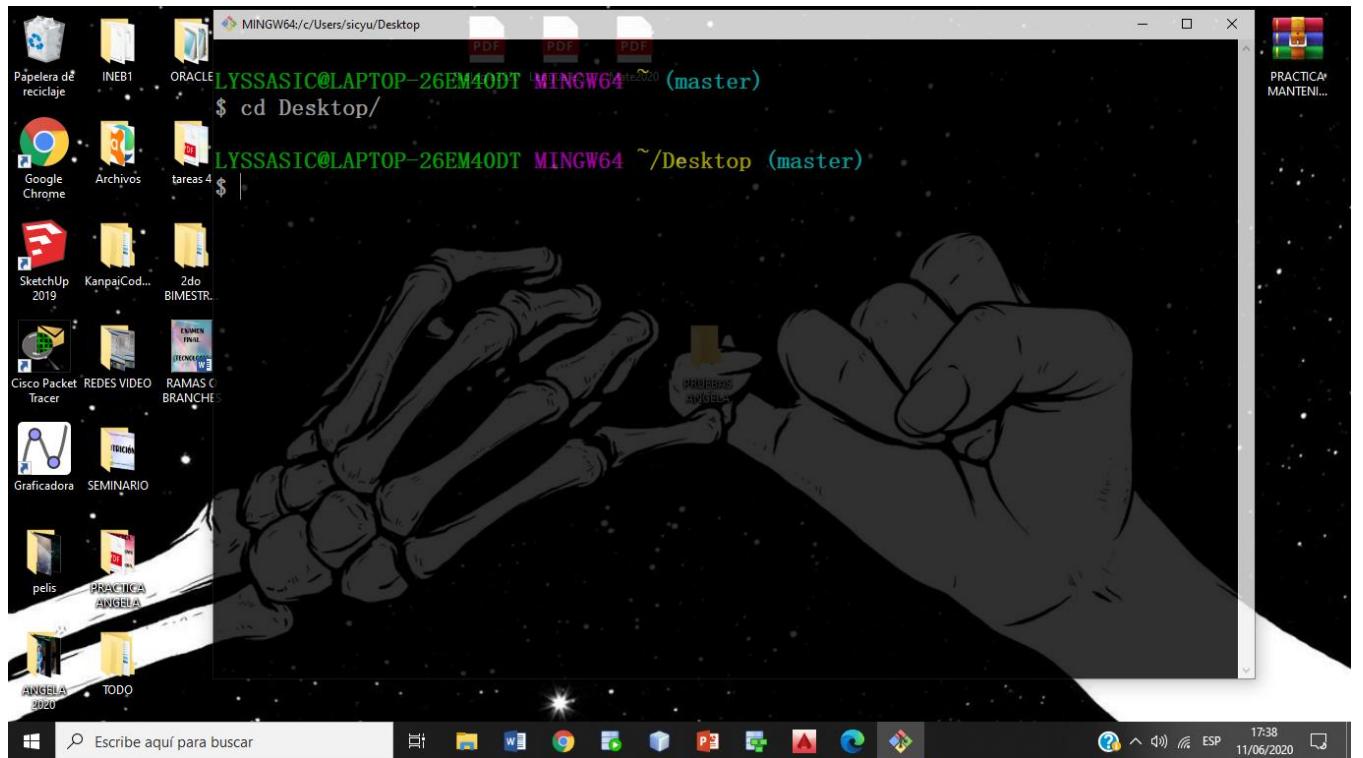

- **RESET EN REPOSITORIOS:**

Los reset nos permiten eliminar los commits que no hemos deseado o por equivocación los hemos comentado ya que solo eliminaremos los que no son útiles usando lo que se deriva al momento de la creación, que un IP y con esa dirección eliminaremos el commit no deseado. Y existen otros RESET.

- **GITHUB:**

GitHub es una página que nos permite crear un usuario, permitiendo interactuar en otras páginas para ayudarnos en proyectos que nosotros seleccionemos, también podemos subir nuestros propios proyectos y hacer FORK y opinando en proyectos ajenos y que nos permitan hacer el cambio que nosotros deseemos.

This screenshot shows a Windows desktop environment with a terminal window open in the foreground. The terminal displays a history of Git commits. It starts with 'N. 3 Archivo txt' (commit d82315e), followed by 'N. 2 Modificacion' (commit 41cf022), and ends with 'N. 1 Archivo txt'. The user has run the command '\$ git branch "PRUEBAS"' which creates a new branch named 'PRUEBAS'. The current branch is 'master'. The desktop background features a black and white illustration of two hands.
